

# UNDERGRADUATE PROGRAMS

## VIRGINIA INTERNATIONAL UNIVERSITY

Now is the time to pursue your dream of earning your degree or enhancing your skills to be prepared for current and future career growth opportunities. Even in this tough economic crisis, the Bureau of Labor Statistics estimates that management, business and financial occupations will increase by 11% by 2018. The computer science and technology industries are expected even more growth as businesses are incorporating new technologies and finding technology solutions to create competitive advantage and efficiencies. Network Systems and Data Communications analysts are expected to be the second fastest growing occupations in the US. Virginia International University (VIU) wants to prepare students for these future growths and opportunities.

VIU is committed to providing high quality education, innovative course instruction, flexible class schedule, and various modes of delivery to meet all the needs its students. The University hires highly qualified faculty who are experts and maintain advanced degrees in their areas of instruction. The faculty provides real-life application that can be applied immediately at your job or used to catapult you to new heights in your career. VIU is dedicated to providing its students a strong knowledge base and academically supportive community to ensure their success and prepare them for the 21st century global workforce.

**VIU currently offers two undergraduate programs on-campus and online:**

- Bachelor of Science In Business Administration (BBA)
- Bachelor of Science in Computer Science (BCS)

An undergraduate degree can be earned by completing 120 credit hours in various concentrations.

## UNDERGRADUATE DEGREES IN COMPUTER SCIENCE (ON-CAMPUS AND ONLINE)

VIU's Bachelor of Computer Science (BCS) program is designed to give a student a state of the art education in both the theory and practice of computer science. It provides a broad knowledge of the fundamental areas of computer science, including programming, theoretical foundations, algorithms, software, and hardware. Upper-level courses involve students in team projects that emphasize industrial processes and practices.

The program is a blend of theory and application that prepares students for a variety of computer science and software engineering positions in scientific and business fields and lays the foundation for graduate studies or employment in a wide range of industrial and technological environments. VIU's location in Northern Virginia, often referred to as "Silicon Valley II," means that graduates of our Computer Science program have ample opportunities to move immediately into employment or go on to advanced study.
